

Trafalgar Gate Link Road Newsletter

January 2011

Happy New Year and welcome to first edition of the 2011 Trafalgar Gate Newsletter January

Information

After a cold winter break for the Christmas period the Trafalgar Gate project team have come back onto site and continued from where they left off.

There has been a few delays so far this year due to the very cold winter days that are upon us. These weather conditions are preventing the team from proceeding with the concrete works as the temperature is too low.

Current Site Works

The main site works at the moment is the construction of the two walls, a retaining wall on the north side of phase 1 and one on a small part of the south side, the landscaping for phase 2 and the erection of the final lamp columns.

The south side wall is near completion. The north side retaining wall is progressing. However, the north wall is considerably longer and will take a bit more time.

The landscaping has started on phase 2 (right turn lane) and this will be ongoing until the opening of the link road.

Street lighting columns for Phase 1 and 2 are close to finishing with only a handful left to be erected and the new traffic signals for phase 1 have been installed and are ready for the opening.

Future Works

Surfacing of phase 1 is required, as well as the painting of the white lines and erection of road signs for both phases

Weather permitting; the TGLR team still hope to have phase 1 of the project (the new link road) partially open and ready for use by mid February 2011.

There is still a fair amount of work that needs to be completed as well as the finishing touches of this outstanding project.

I hope that the next newsletter you receive from us is that of a successful opening.
